Contents Volume 30

Research Papers

Separation of isozymic forms of type II calcium/calmodulin-dependent protein kinase using cation-exchange chromatography
M.L. Vallano (U.S.A.) 1

A method for the relative quantification of lipofuscin based on a computer image analysis system
M.F. Casanova, V. Kollatsos and C.A. Jengeleski (U.S.A.) 11

Detection of zinc in isolated nerve terminals using a modified Timm's sulfide–silver method
B.J. Claiborne, M.A. Rea and D.M. Terrian (U.S.A.) 17

A spectrophotometric assay for glutaminyl-peptide cyclizing enzymes
R.C. Bateman, Jr. (U.S.A.) 23

An improved method for Lowicryl K4M electron microscopic embedding of brain tissue
J.Z. Kiss (Switzerland) 29

A single-ended perfusion method for large, cylindrical cells
S.W. Jaslove (U.S.A.) 33

A fast, high precision and inexpensive analog to digital board for PC-AT or compatible
P.B. Manis and D. Bertrand (U.S.A., Switzerland) 41

A method permitting precise trimming of resin-embedded tissue for ultrathin sectioning in pre-embedding immunoelectron-microscopy
J.A. Valentijn, J.H.H.M. van Daal, B.G. Jenks, J.H.F. van Abeelen (The Netherlands) 55

A low-cost single-board solution for real-time, unsupervised waveform classification of multineuron recordings
A.K. Kreiter, A.M.H.J. Aertsen and G.L. Gerstein (F.R.G., U.S.A.) 59

A triple-labelling method: HRP anterograde tract tracing combined with double immunofluorescent cell staining in developing neural tissue of the rat
P.J.W.C. Dederen and E.A.J. Joosten (The Netherlands) 71

Continuous volume infusion improves circulatory stability in anesthetized rats
L. Quintin, J.Y. Gillon, C.F. Saunier, G. Chouvet and M. Ghignone (France) 77

Location of needle electrode recording sites in the human masseter muscle by magnetic resonance imaging
A.S. McMillan and A.G. Hannam (Canada) 85

Research papers

Sealing cultured invertebrate neurons to embedded dish electrodes facilitates long-term stimulation and recording
W.G. Regehr, J. Pine, C.S. Cohan, M.D. Mischke and D.W. Tank (U.S.A.) 91

Differential intracellular staining of identified neurones in *Locusta* with Texas red and Lucifer yellow
H. Schneider (F.R.G.) 107

Collection and handling of ultrathin serial sections for 3-dimensional reconstruction
N. Wall and J.M. Jagadeesh (U.S.A.) 117

Long-term cultivation of cryopreserved human fetal brain cells in a chemically defined medium
G. Haselbacher, P. Groscurth, U. Otten, H. Vedder, U. Lutz, P. Sonderegger, A. Bulatko, N. Greeff and R. Humbel (Switzerland) 121

Serial determinations of regional cerebral blood flow in the rat using simple chronically implanted platinum wire microelectrodes
A. Jackowski, A. Crockard, R. Ross-Russell and G. Burnstock (U.K.) 133

Conditioned place preference in the corral: a procedure for measuring reinforcing properties of drugs
R.U. Hasenöhrl, M.-S. Oitzl and J.P. Huston (F.R.G.) 141

Mapping of insect muscle fibres innervated by the same motoneurone by intracellular injection with cobalt dye
G. Theophilidis, C. Consoulas and E. Kalogianni (Greece) 147

Behavioral effects of 8-OH-DPAT: studies using the Microtaxic Ventricular Injector
S. Wieland, D. Goodale and I. Lucki (U.S.A.) 151

A new device for monitoring concentrations of intracellular Ca^{2+} in CNS preparations and its application to the frog's spinal cord
Y. Kudo, K. Takeda, T.P. Hicks, A. Ogura and Y. Kawasaki (Japan) 161

A model of proximal middle cerebral artery occlusion in rat
K. Shiraishi and R.P. Simon (U.S.A.) 169
Investigation of multiple simultaneously active brain sources in the electroencephalogram
C. Baumgartner, W.W. Sutherling, S. Di and D.S. Barth (U.S.A., Austria, People's Republic of China) 175

Research papers
Automatic temperature controller for maintaining body temperature in experimental animals
O.J. Campastro, S.A. Gonzalez and J.H. Pazo (Argentina) 185
Double labeling of cytochrome oxidase and γ-aminobutyric acid in central nervous system neurons of adult cats
X.G. Luo, R.F. Hevner and M.T.T. Wong-Riley (U.S.A.) 189
High-frequency components in epileptiform EEG
C.-m. Huang and L.E. White, Jr. (U.S.A.) 197
Whole cell recording from neurons in slices of reptilian and mammalian cerebral cortex
M.G. Blanton, J.J. Lo Turco and A.R. Kriegstein (U.S.A.) 203
Tracing specific transmitter pathways in the rat CNS: combination of [^{3}H]serotonin retrograde labelling with immunocytochemical detection of endogenous transmitters
S. Araneda, R. Magoul and A. Calas (France) 211
Improved artifact rejection and isolation of compound action potentials by means of digital subtraction
I. Kiss and P. Shizgal (Canada) 219
Applications of the expectation-maximization algorithm to quantal analysis of postsynaptic potentials
D.M. Kullmann (U.K.) 231
Calibration of ^{125}I-polymer standards with ^{125}I-brain paste standards for use in quantitative receptor autoradiography
A.J. Nazarali, J.S. Gutkind and J.M. Saavedra (U.S.A.) 247
Recognition of the retrograde reaction in motoneurons using an image analysing system
F. Rauch, A. Schleicher and K. Zilles (F.R.G.) 255
Calibration of ion-selective microelectrodes: flow-system and analysis program for the IBM PC
A.W. Baroiet, R. Andrews and M.E. Morris (Canada) 263
